Claims 1, 5 and 6

The inventions set forth in claims 1, 5 and 6 are disclosed in documents 1 to 3; therefore, the inventions in question lack novelty and do not involve an inventive step.

Claim 2

The invention set forth in claim 2 is disclosed in document 3; therefore, the invention in question lacks novelty and does not involve an inventive step.

In addition, the invention set forth in claim 2 lacks novelty and does not involve an inventive step in the light of document 4 or 5 and documents 1 to 3.

Neither document 4 nor document 5 discloses component (D); however, component (D) is a well-known additive, as disclosed in documents 1 to 3.

Such being the case, it would have been easy for a person skilled in the art to conceive of combining component (C) set forth in claim 2, which is disclosed in documents 4 and 5, with component (D) set forth in claim 2, which is disclosed in documents 1 to 3.

Claim 3

The invention set forth in claim 3 does not involve an inventive step in the light of document 4 and documents 1 to 3.

Document 4 does not disclose component (D); however, component (D) is a well-known additive, as disclosed in documents 1 to 3.

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 1 to 6 are not fully supported by the description.

The compositions are characterized by well-known components, and only a portion of the possible combinations of a binder polymer, a photopolymerizable compound and a photopolymerization initiator are specifically set forth in the description.

Furthermore, the method that employs the compositions in question is not mentioned anywhere other than the disclosure in claim 8.
